Work Offered

Junior Data Engineer.

Does data excite you? Are you on your way to becoming a data scientist? We are looking for capable data enthusiasts to help us work with some fun and interesting projects that requires the ability to query large data sets, recognize patterns, and solve data related challenges using critical thinking and SQL. You will be working with the industry leader in product data analysis and have access to 15 years of experience and historical data. This role will supercharge your analytical skills and give you exposure to real-world data scenarios and tasks.

Main activities include:

- Query building. Fluency in SQL syntax required
- Data analysis. Finding patterns, identifying problems
- Matching and data sanitation. Improving data quality
- Model design. Use Python or R to perform algorithms and reports
- Potential involvement in Machine Learning / AI projects
